

**SMART  
SUSTAINABLE  
SAFE SEAT**

*Built for strength and heavy use, first and foremost, considering the simplicity, beauty and comfort. By bringing style and versatility to any environment, it can be customized to fit its settings depending on the environment and requirements while offering a long lasting function.*

*It adds beauty and style to any location and is ideal to conform to the landscape and provide pedestrians a clear and safe passageway.*

## SMART SEAT

*A sustainable and safe solution*

Rapidly evolving threat environment by terrorists demands a proactive response. C3C is proudly introducing its functional, smart and protective solution, a Smart Seat!

Having a simple and unique design, an eco friendly product gets the advantage of IoT technology & by the usage of different sensors collects and exchanges data in devices for the purpose of security measurements and acts as a protection in case of vehicle ramming attacks & smashing into crowds. Sensors can be varied to control the temperature & pollution and provide different services based on the customers' demand.

Then why not a parkour park, a bench for an interesting conversation or a comfortable product that simultaneously cleans the air? There is a collection of beautiful designs with specific technical calculations which fulfill your requirements.

Over 100 production sites are accessible around Sweden, Norway and Finland. Production process from the enquiry to after sale's services are control-

led by our exclusive internal application to assure a high quality and ontime service to our customers. There are different types of payment methods; direct sale, rent or leasing. It's all up to you. We care! We are looking forward to a long-term business relationship with our customers!

### C3C's SOLUTIONS ARE:

- Eco-Friendly
- Comfortable
- Energy Saving
- Smart Solution
- Integrated Protective Technology

## WE ARE C3C

C3C is an innovative Company with a brilliant team, different product groups and multi-functional solutions. Our products are made of recycled concrete, resistant to abrasion and with durability of reinforced high-quality material. In our innovation factory, C3C Labs, we love to experience new things and change the negative into positive.
